Do Your qualify to receive these incentive payments? Please visit our website at *HealthIT.wa.gov* or go to CMS Getting Started **to learn more.**

What You Should Do Now…...For a Possible Audit Later

Provider Attestation Record-Keeping Reminder:
CMS and HCA cannot emphasize enough, the importance of saving all supporting documents used for attestation. The most accurate data reflecting the attestation is best saved **at the time of attestation and submission**. These may be reports, screenshots, and patient lists. During the course of an audit, providers must be able to provide documentation to support their attestations as submitted. We want you to be successful. Providers who wait until they are audited to try to recreate or recover documentation are putting themselves through unnecessary work, time, and expense.
